- Owner's suite and living/family room pre-wired for video and data
- Hard-wired smoke and CO detectors with battery back-ups located in each bedroom and each level of the home

Energy and Environmental Savers

All construction meets or exceeds the U.S. EPA ENERGY STAR PROGRAM and homes are designed to sustain the environment, enhance comfort and reduce energy bills. Steps taken and features include:

- Wonderland Homes ensures your home's compliance by testing 100% of our homes via third-party inspectors twice throughout the construction process
- Low VOC (volatile organic compounds) content paints and finishes
- Ultralight HDF trim and engineered TruJoist "I" joists used for floors
- Large, dimensional solid lumber avoided wherever possible
- Oriented Strand Board (OSB) is used for sub-flooring, exterior sheathing and roof decking (new growth lumber vs. old growth)
- Insulation of R-19 in flat and pitched ceilings, R-21 for exterior walls, and R-49 in garage ceilings underneath living spaces
- Polyseal foam sealed top and bottom plates, corners and exterior penetrations (pipes, vents) for maximum efficiency
- Two 92% efficient gas furnace with electronic ignition and continuous exhaust air ventilation system for controlled air circulation that gives you increased comfort and better indoor air quality
- Two 13 SEER AC condensers
- Centralized return air ducts or hard ducted returns, all of which are sealed with high performance mastic
- *Navien* high-efficiency tankless water heater
- *Honeywell* programmable setback thermostat with seven-day capability
- Energy Star rated low maintenance vinyl double insulating, low-e glazed windows
- *PEX* piping throughout the home plumbing system
